

# Sensors

## Valid Sensor Types

- Temperature
  - DS18B20 1-wire
- Volume\*
- FlowRate\*
- Humidity
- Light
- Sound

\*Volume and FlowRate are typically both components of the same counter. For 1-Wire devices in LtSense, currently a single counter will be represented by two sensor elements, one where the id ends with a -FR and the other with a -V for FlowRate and Volume respectively.

\*All 1-wire within OWFS are supported

\*\*Capitalization matters.
