

Sensors

Valid Sensor Types

- Temperature
 - DS18B20 1-wire
- Volume*
- FlowRate*
- Humidity
- Light
- Sound

*Volume and FlowRate are typically both components of the same counter. For 1-Wire devices in LtSense, currently a single counter will be represented by two sensor elements, one where the id ends with a -FR and the other with a -V for FlowRate and Volume respectively.

*All 1-wire within OWFS are supported

**Capitalization matters.
